Delray Beach, FL 33445

Dear Mr. Jablow,

I am writing to recommend EZ Shelf designed by Tube Technology Inc. I have been the Maintenance Supervisor of the Maryville Housing Authority since 2001. We are a public housing in the northwest corner of Missouri with 128 units. We are a smaller housing authority compared to the bigger cities, but wear and tear on the apartments are comparable to larger housing sites.

About ten years ago we installed the EZ shelves from Tube Technology in all our apartments. We purchased approximately 800 shelves from the company. I was amazed at how easy they were to install. The contractors that put them in were very pleased with how simple they went in. It cut back on installation time, saving labor costs. Fast forward ten years and the workmanship and durability of the shelves have exceeded expectations. They have held up well considering tenants stack heavy boxes and hang lot of clothes on them. Another time saving factor is when we turn over the apartment to paint the EZ-shelf can be easily taken down and put back up very quickly.

Overall I would highly recommend the EZ-shelf for any application or any type of living quarters. Be it rental property, commercial, or residential the EZ-shelf makes life easier. I am one satisfied customer.

Sincerely,

Michael T. Casteel
Maintenance Supervisor
Maryville Housing Authority
