“Two very professional, friendly gentlemen arrived when they said they would. Were considerate of my home (used shoe covers and floor mats to keep floors clean). Quickly and efficiently cleaned my dryer duct, shortened it for best function and then tested to make sure it was working properly before leaving. They answered questions as they went and were pleasant to have in my home.” – **Tracy M.**

“Totally professional job. Delayed arrival due to unexpected problems on another job, but notified me well in advance and kept me informed. Described the process before beginning the job and answered many questions on related services which I am considering without any pressure tactics whatsoever. Work was thorough and additional professional advice was provided based on an inspection of a minor problem I was experiencing with our washing machine. I would recommend this company with no reservations. These folks are prime examples of what the home services industry should be like in terms of customer service.” – **Kenneth A.**
