

The Concore difference is more than getting projects built successfully. It's all about how we do it. As experts in our field, we provide our clientele with two specialized construction service offerings — project management and tenant improvements.

We represent property owners by providing management services for multi-family and commercial construction projects — from design coordination and permit approval, through construction oversight — right through to a job's completion.

We also engage with clients as the prime contractor in a design-assist roll for a wide variety of tenant improvement projects — taking on full project responsibility from design to tenant occupancy.

At Concore, the difference is in how we do it!
