

COMMERCIAL & INDUSTRIAL CONSTRUCTION  
CBC 1255645

May 21, 2009

To Whom This May Concern:

We have turned to E. Wilson Corp. for nearly three years to meet our framing and drywall needs in connection with various commercial and residential projects we have constructed over that span of time. E. Wilson Corp. provides us and our customers with high-quality materials and labor, rendered in a friendly, timely manner. In fact, many of the other subcontractors who have followed behind E. Wilson's framing and sheetrock teams have commented enthusiastically on the quality of their work and cleanliness of the job site when they are done. We have never experienced any safety issues or claims associated with any of E. Wilson's employees.

Willy Grunewald is a problem-solver. His approach to his craft is to find effective solutions to the myriad challenges that arise during the completion of any construction project. We particularly appreciate his commitment to meeting scheduled deadlines and his willingness to accommodate the scheduling changes sometimes necessitated by the unique circumstances of each job.

Based upon our experience with Willy Grunewald in the field, Uri Grunewald in administration and accounting, and their various framers and sheetrock installers and finishers, we would highly recommend E. Wilson Corp. for your framing, sheetrock and other construction needs. Please feel welcome to telephone me at the number provided below if you have specific follow-up questions.

Sincerely,

*Thomas P. Hall*
