Subject: Letter of Recommendation – New US Embassy, Port-au-Prince, Haiti

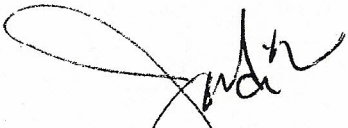

Dear Mr. King:

I would like to take this opportunity on behalf of Fluor Government Group, to “thank you” for your quick response to our recent request for services at the New US Embassy Project in Port-au-Prince Haiti with regard to finding a subsurface leak as a result of a ground rod being driven through a main water line.

We called late in the afternoon and within 24 hours you and your equipment were headed to Haiti to assist us. It is refreshing to find a company with such absolute client focus and response to our needs and our critical schedule. Your experience and world class equipment helped us to find the leak quickly and with little effort on the part of our field crews.

We appreciate your efforts and want to say working with you and your team was a pleasure. We would highly recommend your company and process for leak detection to any organization with a subsurface leak issue.

Sincerely

Judith Hiatt-Rabb
Sr. Project Director
Fluor Government Group
NEC Port-au-Prince, Haiti
