

Hi Laura,

I wanted to make sure you knew how appreciative we were for the work that Luis and the whole crew did in not only getting the granite in place, but the overall job and finished product. It does look absolutely wonderful even now and will look that much better when the whole kitchen is finished. It is really great to not have a single seam on the island, and I know that it was not easy to fabricate and install such a large piece. Please tell everyone on your team a big 'thank you' from us.

A couple questions about sealing the granite. I know that Luis sealed the granite yesterday, but is that something that we need to do again periodically? If so, should we also use the same product that Luis used; how often would you recommend; can we do it too much/too little? We want to make sure we do everything we are supposed to in order to maintain it looking brand new!

Also, let us know what to do about the remnant(s) that are left over, and whether we pick up at your place or how that works.

Thanks again,

TB
