

Letter of Recommendation for Chrisanntha Construction Corporation

To Whom It May Concern,

Our company, Amada Tool America, Inc. recently had the distinct pleasure of contracting with Chrisanntha Construction on the design and construction of an additional manufacturing building and the installation of a new parking lot. We as a firm feel privileged to have been in the very capable and experienced hands of team Chrisanntha Construction, who made the entire experience easy from start to finish.

To those who are considering Chrisanntha for their own project, we would wholeheartedly recommend this very professional and knowledgeable team to you. My hats off to Kevin Bragg and his team for getting this project done on time and within budget. The buildings walls are pre-engineered with insulation pre-installed, and external and internal finishes already completed, thus shortening installation time. The end result is an extremely efficient and tight building that is easy to heat and cool.

Each step in the building process Chrisanntha was there for us. They understood our needs and formulated efficient plans all while keeping our tight construction timetable. Chrisanntha was very responsive and made sure to address any questions or concerns we had both quickly and thoroughly. In the end, they delivered our building on-time and on-budget.

We thank Kevin and all of team Chrisanntha for all they have done. We highly recommend them for all your business construction needs.

Sincerely yours,

Edward Dries
Chief Operating Officer
Amada Tool America, Inc.
