

February 2, 2012

Fitzpatrick Dental Design and NK cabinets have been working together designing, fabricating and installing millwork in dental offices since 2000. NK cabinets has always provided my customers with exceptional craftsmanship, competitive pricing, on schedule delivery and an incomparable eagerness to work as a team player.

Norik has always gone above and beyond my expectations to protect our reputation by providing our clients complete and total satisfaction. His pride, integrity and passion for his work are clearly reflected in the quality of his finished product, all of which have without question added significant value to the services we provide to our customers.

I will continue to give NK cabinets my highest recommendation and encourage you to contact me with any questions or further discussion.

Sincerely,

Brenden Fitzpatrick
