10 August 2015

TO WHOM IT MAY CONCERN:

It is with great satisfaction that I write this letter of recommendation for Accelerated Construction Services. My district is currently involved in the construction phase of a twenty-five million dollar renovation project. I've been involved with ACS from the inception of the project and have been interacting with them daily ever since.

ACS and their representatives have been a key component to protection of the district's interests as well as the completion of the project in general. I can say with great confidence that without the ACS Construction Manager being on site daily, including evenings and weekends when necessary, that our district would have experienced great problems in the aforementioned areas.

Accelerated's representatives are very detail minded when dealing with all aspects of renovation. Their focus on areas ranging from classroom layout and utilization of space to the completion of all phases of work being performed by a multitude of contracting teams has ensured that all work is completed accurately and in an expedient manner. We are currently in the final stages of our Senior High School project and I feel that without ACS representation the project would not be completed in time to accommodate our opening on the first day of school.

Mr. Mike Allen, as well as any member of his team, is a hands-on type of person who is readily available and easy to contact. We placed our faith in the expertise of his group, relying on their suggestions and recommendations as those that are best for the quality of our project. Thus far I feel that the trust placed in them has proven to be highly warranted.

The High School project was a learning process for me as it was the first construction project that I was actively involved in. As we go into the Elementary phase of our renovation project this fall I feel a greater confidence because of the trust and respect that I have gained in ACS and their construction manager.

I highly recommended Accelerated Construction Services for any project that you may be planning. Their focus, attention to detail and willingness to go the "extra mile" to get the job done has proven to be the driving force in our project. I'm certain that you will find satisfaction in their performance. If you have any questions, feel free to contact me at 724-966-5045 x4270.

Sincerely,

John Menhart  
Superintendent
