### David Benson, P.E. Joins Steel Nation Engineering

**Southpointe, PA** – Effective immediately, David Benson is welcomed to Steel Nation’s growing Engineering division. David is a licensed Professional Engineer with a focus on structural engineering. He joins Steel Nation after six years with the Westinghouse Structural design team. A graduate of Virginia Tech University, David earned his Master of Science degree in Civil Engineering from the University of Pittsburgh. David has a wealth of experience in engineering design, construction support, and creative problem solving.

Steel Nation President, Mark Caskey said, “Steel Nation has achieved its success by carefully selecting the proper team members to drive our four divisions, Steel Nation Buildings, Steel Nation Engineering, Steel Nation Environmental, and Steel Nation Facility Services. David brings a valuable mix of experience and expertise to our organization.”

“I’m excited about becoming a part of the engineering team,” said David Benson. “Steel Nation is a dynamic company that has experienced remarkable growth during the past ten years and has the potential for continued success.”

Steve Bauer, P.E.,S.E. General Manager, Engineering said, “We’re very excited to have David join the team. He brings creative solutions to the table that add value and save time and cost for Steel Nation clients.”

[Steel Nation](#) is a proud Washington, PA-based corporation working primarily in the energy sector of North America. Steel Nation is the leading designer/builder of transmission, storage and compression facilities, for the mid-stream and transmission operations of the Oil & Gas industry throughout the Marcellus Shale, Utica Shale and other American reserves.
