RE: Spectrum Assisted Living & Memory Care – “Lombard Place”
Lombard, Illinois

Jason,

We want to take this opportunity to commend you and Chicago Masonry for the brick and stone veneer work at the Lombard Spectrum Senior Living project.

The open communication from the submittal process and pre construction meetings through final demobilization was thorough and professional by you and your field staff.

Both your Superintendents Paul and Greg along with the field foreman Chris were attentive to all of our safety requirements as well as the challenging logistics, sequencing and staging the project presented.

Your foreman and crews attention to the proper details and specifications in the areas behind the brick, from proper flashing techniques thru maintaining a clear air gap was recognized not only by myself and other Weis field staff but also by Weis' QA/QC manager. In fact, a company-wide internal memo was issued by our QA/QC Manager after his inspection of your work to illustrate as an example of a clean and proper air-gap.

Most design conflicts and issues brought to our attention by Chris were accompanied by a suggestion to help resolve the issue properly.

This attention to detail combined with craftsmanship was observed from Chris and his crew throughout the project and yielded a well built, attractive masonry project.

I have received several compliments on the Lombard brick work from Spectrum's owners and management team, Lombard building officials and Weis Builders management.

Congratulations to you and your team on a project well done.

Sincerely,
Weis Builders, Inc.

George Röhrig
Senior Superintendent
