Letter of Recommendation for:

Denney Excavating, Inc.
2050 S. Harding St.
Indianapolis, IN 46221

To whom it may concern:

F.A. Wilhelm Construction has enjoyed an excellent working relationship with Randy Denney and Denney Excavating since 2009. The projects Denney Excavating has been hired to complete range from small, specialty demolition work to multi-level structures in confined, urban spaces. Randy Denney and Denney Excavating have teamed up with Wilhelm to raze three parking structures: a five-level garage on the campus of Purdue University, a three-level garage in downtown Indianapolis, and a five-level garage in Bloomington, Indiana.

Together, Wilhelm and Denney Excavating have successfully managed challenging demolition projects for Eli Lilly and Company, Rolls Royce, and Ingredion, since our relationship began. On these projects, our teams are required to maintain existing on-site client operations, work within limited operational space, meet compressed completion timelines and above all, maintain the highest level of safety for our employees and the general public. All this work has been overseen by Mr. Denney and his first-class team of employees.

I highly recommend Randy Denney and Denney Excavating for your next demolition project.

Sincerely,

F.A. Wilhelm Construction Company

Philip Kenney
President
