To Whom It May Concern:

Franciscan Health has worked with Denney Excavating for the demolition and removal of two of our Lafayette based hospitals. In 2013, Denney Excavating was hired through, and in agreement with, Columbian Park Redevelopment to raze the Home Hospital in Lafayette, Indiana. Denney Excavating is currently working as a sub-contractor for Tonn & Blank Construction on the demolition of the St. Elizabeth hospital, which is owned and operated by Franciscan Health.

Denney Excavating's team has displayed awareness for possible job site hazards associated with the demolition of both these large structures and the challenges of razing these buildings in an urban environment. They have displayed a proactive approach to recognize and mitigate hazards while maintaining an organized work area.

Sincerely,

**Terrance E. Wilson**
