To Whom It May Concern:

We have had the pleasure of working with Altec, Inc. on a few of our projects and consider them to be very professional and timely with their work. When it comes to our window projects, Altec is who we call first and lean on for assistance when it comes to establishing budgets for our clients or simply helping us suggest the right product for our client.

If you are considering using Altec on your next project, I'm sure they will serve you with the same professionalism we have come to expect and receive over the years.

Sincerely,

Dennis T. Gunter
Principal
