

I has been a pleasure working Gateway Builders construction throughout the duration of their Project. They have been easy to work alongside with. From their laborers to their subcontractors and all the way up to their management staff. They have assisted me personally on many different occasions. One example I can refer to is on a day where I felt overwhelmed because of the work load Gateway assisted with bringing down tenant's rubbish and everyday trash down to the subbasement where it can be properly disposed of. Just like in any relationship, the small thing matter Gateway goes above and beyond to make sure the job gets done and also assists with a lot of the small thing that may seem to be insignificant to some, but goes a long way in the eyes of others. I always felt the team at Gateway was an extension of our team, sharing our vision and execution to our expectations.
