aMbooo

Useful facts about bamboo:

- Bamboo grows faster than any other plant on earth.
- Bamboo generates 10-30% biomass yearly.
- Some bamboo species grow up 3 feet in a day
- Bamboo has no thickness growth, stemming entirely from the ground
- Bamboo is used in the production of biodiesel.
- Bamboo is used to replace steel reinforced concrete in the building industry.
- Bamboo has been known for a long time as an unbeatable help against soil erosion.
- Bamboo derivatives are employed in car manufacturing and in other industrial products

Reasons which make aMbooo bamboo products so worthwhile

100% Bamboo

As a basis we exclusively use highland bamboo, hard, fast re-growth and tree-free.

Long-lasting

Our thermal treatment modifies the bamboo fibres thus increasing durability.

Simple & fast

Frontal tongue + groove and longitudinal groove enable simple, safe and quick mounting.

Durable and hard

Strong as steel and as long-lasting as tropical wood but CO2 positive.

CO2- neutral

Up to 1 metre growth a day. A giant grass with best marks for ecology.

Dimensionally stable

No natural spiral grain as with wood. Very low absorption and contraction behaviour.

Decking and fence with system

Tongue & Groove minimizes material waste during installation

Anti UV Shield

With our maintenance products guaranteed less color change caused by UV Light.

Fire Rating

Class A rated according ASTM E84

Skid resistant

With our surface design we achieved high resistance

Manufacturing aMbooo decking and fence boards

The manufacturing of aMbooo products is realized exclusively by using bamboo culms from sustainably managed bamboo forests. Each culm must be at least 5 years old and harvested in the highlands. Only highland bamboo possesses sufficient strength to stand up to both our and your demands for modern and resistant decking boards.

The culms are processed through thermo-mechanical technology. This process has been developed by us over decades and matched to the requirements of a premium product. All our decking and Fence boards are thermo modified.

The right

CARE

It is recommended that initial treatment be carried out with aMbooo Special Bamboo Care Oil after products have been installed (please read the instruction guidelines). The products are subject to weather incidence, such as rain, sun, wind, ice and snow and may naturally change their form and appearance through the influence of these elements.

This aging process underlines the natural quality of the materials employed.

With aMbooo care products, the surface can be preserved in its original color for a long time.

When laying aMbooo products in the pool area, regular cleaning and care is particularly important. Oil is environment friendly and non-flammable.

SELECT
WHITE OAK

One decking board
with a choice of two designs!

partly fine ribbed,
smooth

With edge grooved for deck clips and
tongue and groove matched ends.

Attention: Natural color differences are possible

Material: Bamboo
Size: 3/4" x 5 1/2" x 6'8"
Surface: 2x pre-oiled

SELECT
GRANITE GREY

One decking board
with a choice of two designs!

partly fine ribbed,
smooth

With edge grooved for deck clips and
tongue and groove matched ends.

Attention: Natural color differences are possible

Material: Bamboo
Size: 3/4" x 5 1/2" x 6'8"
Surface: 2x pre-oiled

A scenic view of a wooden deck leading to a turquoise ocean under a bright blue sky with a large sun. The deck is made of dark brown wooden planks that recede into the distance. The ocean is a vibrant turquoise color with gentle waves breaking on the shore. The sky is a clear, bright blue with a large, bright sun in the upper right corner, creating a lens flare effect.
