RE: Letter of Recommendation for Link2Inc

To Future or Prospective Clients of Link2Inc;

My firm, Antenora Architects LLP, recently completed a move to a newly remodeled office space in Austin, Texas. We are a 20-year-old architectural firm with 10 employees.

We retained the services of **Link2Inc** to help us install new cabling and a server rack for our data and telephone network, and to help us move our existing telephone and data systems to the new space.

Link2Inc was exceptional in their work for us. Their work was completed correctly, in a timely fashion and the work was beautifully done. They even cleaned up their mess on their way out.

Based upon their work for us, I heartily recommend Link2Inc to you.

Should you have any questions or would like to discuss their work for us, please feel free to contact me at our office number listed below, or by email.

Most Sincerely,

Michael S. Antenora AIA
Founding Principal
Antenora Architects LLP
