RIVER CITY
ENVIRONMENTAL INC.

INDUSTRIAL CLEANING

A clean and well maintained business is an efficient, effective business; that's why at River City Environmental we work hard for our customers to ensure their lots and equipment sparkle. From regular maintenance such as sweeping, striping and catch basin cleaning – to emergency spill cleanup and remediation – look to River City for a comprehensive line of industrial cleaning and industrial maintenance services. We are confined space entry trained, competent man trained, fall trained, and trench trained. Our Field Service Managers prepare site-specific work schedules and safety plans for every project to ensure that all work is completed on time, according to your specifications, and in compliance with all regulations. River City is an established Northwest-based business that exceeds client expectations while maintaining the highest level of safety standards and upholds an impeccable safety record.

- Drop boxes
- Emergency spills

BIOSWALES

Regular maintenance is required to ensure continued effectiveness and system longevity, including regular mowing and reseeded, as well as inspections for erosion, weed control, and trash removal. The team at River City Environmental has the experience and know-how to build, maintain, and manage any stormwater bioswale at your business or residence.

- Vegetation Establishment
- Emergency Watering
- Management of Extreme Events
- Excavation and Removal of Pollutants
- Damage Repair
- Sediment Removal

SNOW REMOVAL

We provide snow removal, clearing and deicing at your business or residence throughout the Portland metro and Southwest Washington areas. River City Environmental continually monitors meteorological data to anticipate changes in the weather. Our services are available 24/7 because snow and ice don't always come during normal business hours.

- Snow/Ice removal
- Business or residential
- 24/7 emergency response
- Flexible plans
- Site evaluation
- Exceptional safety

SEPTIC

River City's commitment to service and quality has made us a leader in the Pacific Northwest for septic services since 1995. We work with city and county personnel to obtain access to installation records, and have experience obtaining the proper permits for your site. We are Oregon and Washington certified septic inspectors and installers.

- Inspection
- Pumping
- Cesspools, holding tanks, gravity systems
- Installation
- Repair
- Sewer hookup and decommissioning

LIFT STATIONS

River City Environmental is your Northwest source for comprehensive lift station maintenance and service. From scheduled maintenance and cleaning, to checking the amperage and complete pump or panel replacement, we do it all. Our knowledgeable operators are trained for confined space, and know how to enter vaults for optimal maintenance.

- Control system repair
- Leak repair
- Pump replacement
- Replacing electric floats
- Sump and vault repair
- Video inspection of lines

GREASE TRAPS

River City Environmental provides a complete range of repair and maintenance services. As a member of the Preferred Pumpers Program, owners of grease traps/interceptors can rest assured that pump-outs will be completed correctly and in accordance with industry standards.

- Grease traps and interceptors
- Restaurant oil recycling
- Cleaning and line jetting
- Repair and replacement
- In-line video inspection
- Emergency spill clean up

EXCAVATION AND HYDRO-EXCAVATION

From under foundations to major earth moving projects – River City Environmental is ready for your excavation project. River City has provided experienced, qualified, professional operators running well-maintained backhoes and trackhoes since 1995. Our low minimum costs and high productivity will save you time and money on excavation projects.

- Demolition
- Erosion control
- Emergency repairs
- Sewer installation
- Catch basin install/replacement
- Tank decommission

EMERGENCY SPILL RESPONSE

River City Environmental handles any size spill - from spilled milk to environmentally hazardous derailments. With 24 hour emergency response, our team of professionals take care of large industrial spills throughout the Pacific Northwest. Business or residential, we are available 24/7/365 to provide whatever services are required.

- Hydraulic oil
- Oil barrels
- Diesel fuel
- Sewer and septic systems
- Railcar derailment
- Truck rollover
- Flooded areas
- Solids and liquids
- Water way
- Lift station failures
- Roadside accident cleanup

DROP BOXES

River City offers reliable, same day Drop Box and Roll Off services for residential and commercial customers. River City works closely with businesses, schools and residential customers to minimize waste, maximize recycling and work toward sustainability. From weekly garbage and recycling collection to emergency cleanup, the River City Environmental team is quick, clean and quiet.

- Recycling
- Solid waste hauling
- Rock and soil removal
- Yard debris
- Construction sites
- Roofing debris

PARKING LOTS

Whether it's protecting your parking lot with sweeping, sealcoating or providing a clean, well-marked parking lot for your customers and employees, River City is your resource for parking lot and pavement maintenance. Count on us for timely and professional sealcoating, striping, sweeping, clean up, pressure washing, snow removal and more.

- ADA compliance
- Pavement repair/maintenance
- Snow removal and deicing
- Cleaning and sweeping
- Signage
- Sealcoating

PLUMBING AND DRAINS

Our fully licensed technicians can tackle all your plumbing needs, including residential and commercial repairs, plumbing for new construction, and plumbing for remodels including complete sewer line replacement and lift station maintenance. No job is too big or too small.

- Sinks, tubs, faucets, showers and toilets
- Water line repair and replacement
- Camera and video inspection
- Drains and disposals
- Septic and sewer
- Hot water heaters

STORMWATER SERVICES

River City Environmental can help you comply with the EPA's Clean Water Act as well as local and regional water quality regulations. From maintaining catch basins and sedimentation manholes, to installing filtration systems, we'll help get your site compliant.

Servicing your catch basins on a regular basis is important. Frequency for maintenance depends upon the pollutant load at your site, site and typical weather conditions. Metal roofs also create metals that need to be removed to ensure stormwater regulation compliance.

River City can retrofit your existing catch basin or replace existing systems with a **CleanWay** filtration insert. River City provides complete installation and maintenance services for **CleanWay Environmental Partners, Inc.** filtration systems and the stormwater treatment systems of most manufacturers.

- Catch basin installation
- Catch basin maintenance
- Meet EPA/NPDES regulations
- Stormwater filter cleaning
- Oil-water separator cleaning
- Vector truck services
- Compliance testing and reporting
- Onsite Sewage System (OSS) inspection reports for Washington County, OR
