OUR COMPANY

Alltracon helps businesses create industrial solutions for their facility & logistics needs. Safety and competitive pricing with value engineering is a core focus in our turn key solutions. We have successfully delivered outstanding results to large and small businesses across many industries which include: refineries, steel mills, chemical plants, plastics extrusion, automotive, and specialized manufacturing to name a few.

OUR SERVICES

A few of the construction services we specialize in:

PLANT MAINTENANCE / UPGRADES

During scheduled plant shutdowns or maintenance, Alltracon quickly and safely engages in plant and equipment upgrades, repairs, cleaning, demolition, and transport within specific time frames.

HEAVY MACHINERY RIGGING AND HANDLING

Alltracon creates lift plans and sources proper machinery and rigging equipment. Our crews are trained and certified in the proper use of rigger signals and equipment which meet the highest OSHA safety standards.

STRUCTURAL STEEL ENGINEERING, FABRICATION, AND ERECTION

Customer's needs are turned into certified, stamped drawings. Our certified welders and iron workers fabricate the needed structure to specification and erect / install the structure with safety and precision.

HEAVY EQUIPMENT TRANSPORT LOGISTICS

In moving heavy equipment, necessary permits, route plans, load factors, and vehicle escorts are addressed by our transport logistics staff.

SOURCING SOLUTIONS FOR SPECIALTY PRODUCTS

For "hard to find" specialty products, our project managers use special research tools and our network of business relationships to procure any specialty equipment necessary for job completion.

INDUSTRIAL MACHINERY EQUIPMENT RENTAL

Alltracon's fleet of specialized lifts, hand and hydraulic tools, rigging equipment, and more is available for long and short term rental.

DESIGN BUILD

Ground up support:

- Designing/building solutions, prototyping
- Certified and stamped blueprints
- Specialized labor force of welders, millwrights, ironworkers, and riggers

RIGGING HAULING

Heavy equipment moving logistics include:

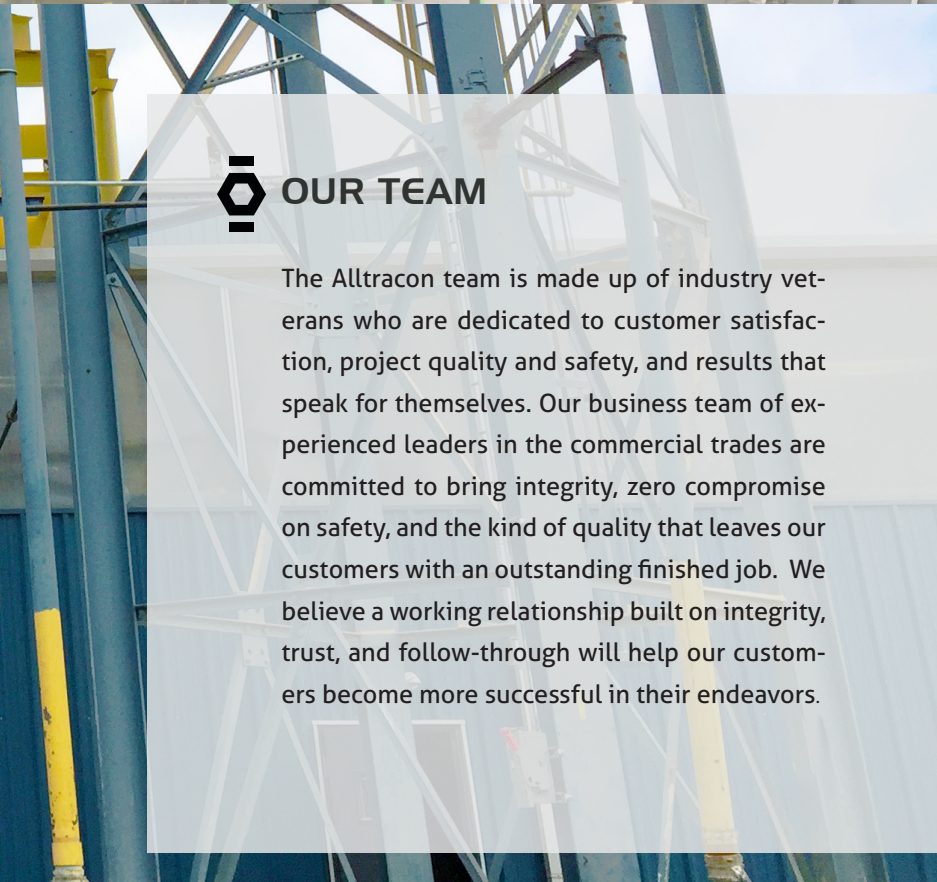

- Creation of lift plans
- Crane and permit procurement
- Certified rigger and signal training
- Short / long term warehouse storage

FABRICATE INSTALL

Serving established manufacturers through:

- Demolition and site prep
- Certified welding and pipe-fitting
- Fabrication and installation of structural steel

OUR TEAM

The Alltracon team is made up of industry veterans who are dedicated to customer satisfaction, project quality and safety, and results that speak for themselves. Our business team of experienced leaders in the commercial trades are committed to bring integrity, zero compromise on safety, and the kind of quality that leaves our customers with an outstanding finished job. We believe a working relationship built on integrity, trust, and follow-through will help our customers become more successful in their endeavors.

"When our work is so good that it cannot be ignored, success becomes a natural result of who we are."

NOTES

OUR SAFETY PROGRAM

As an ISNetWorld company, safety is our unquestionable priority. Our safety measures include engineering controls, up-to-date equipment, ongoing training and proactively removing identifiable hazards.

Our team is 100% committed toward a zero incident workplace. Site implemented minimum safety requirements include:

- Hot work lockouts
- Drug free workplace
- Daily safety plan reviews
- Regular tool and equipment safety inspections
- Up-to-date OSHA training
- OSHA 10 minimum to be on-site
- OSHA 30 goal for team
- Fire extinguishers and first aid on-site
