

I wanted to thank you for the awesome response we received from one of our wireless motion systems we purchased from you. A guy attempted to steal our appliances in one of our communities and was caught by Lewisville Police with his vehicle loaded with our appliances. As a result, he was arrested and charged, along with many other charges for outstanding warrants. Additionally, we even had the appliances returned with very little to no damage. We really like these systems because they give the ability to catch thieves in the act, unlike other systems.

Thanks again!

Kris Maag
