

We had a large truck and trailer pull up in our backlot at 4:00am. Your motion camera's picked up this truck, your team called me and the local police department instantly. Police arrived on site in six minutes. Although we did not catch anyone. We did not have anything taken from us. I'm am confident, the quick reaction time from your team, insured our inventory was protected. Since I have installed your system, I can sleep at night knowing your team is watching out for us. Thanks for all you do. Above is two of the multiple live videos I received.
