QUANTITY OF FRAC:	400 TON EQUIVALENTS (TE)
TYPE OF PAVEMENT:	New
ACE BIFER MIXING DAYS:	1 Day
DEPLOYMENT METHOD:	Manual with Technician
CBC CERTIFICATION:	Yes
SOLD BY:	CFS
YEAR SOLD:	December 2017

The City of Prescott added ACE Fiber to their Sun Dog Trunk Main Phase A project as a test pilot. The fiber reinforced asphalt concrete (FRAC) was placed on a quarter mile section of the West lanes from Lillian Lane South on SR 89, just short of Willow Lake roundabout. This section of the road has a lot of truck traffic, and ACE Fiber will help to extend the life of the road.

Fann Contracting reported no noticeable differences in raking, placing, or compacting this asphalt as compared to asphalt without fiber. They were pleased with ACE Fiber's performance.
