

CASE STUDY STORMWATER MANAGEMENT

VIEJAS CASINO

ALPINE, CA

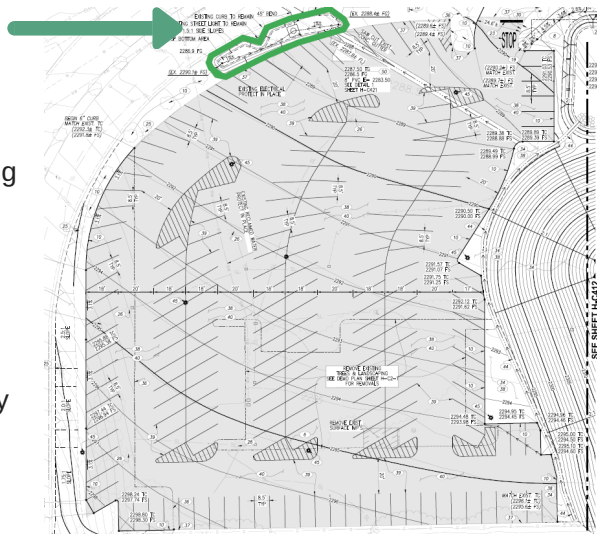

PROJECT/PRODUCT DESCRIPTION:

Masson & Associates specified FocalPoint at the Viejas Casino Phase III Project in Alpine, CA. The FocalPoint will treat 3,220 cubic-feet of stormwater runoff from the hotel parking lot. The project is currently in the landscaping phase.

FocalPoint High Performance Modular Biofiltration System (HPMBS) is a scalable biofiltration system which combines the efficiency of high flow rate engineered soils (100 inches/hour) with the durability and modularity of a highly pervious expandable underdrain/storage/infiltration system.

FOCALPOINT BIOFILTRATION SOLUTION:

The biofiltration footprint fit easily into a planter on the north side of the parking lot. The flexibility of FocalPoint allowed for increased building occupancy since no parking spaces were sacrificed by large bioretention basins. FocalPoint is about half the cost of other proprietary biofiltration systems currently on the market.

CLIENT NAME:
Rand Engineering, Inc.

PROJECT REFERENCE:

Chris Rand
P.O. Box 1830

YEAR:

2018

PROJECT SIZE:

52.5 SF Total

FOCALPOINT MEETS TAPE REQUIREMENTS

BENEFITS OF FOCALPOINT

- Flows at 100 in/hr
- TAPE Certified
- Reduce Footprints and Costs
- Flows faster with age
- Resistant to clogging
- Expanded Detention, Infiltration, and/or Storage
- Post-Installation Verification
- First Year's Maintenance Included
