Great job. Fast and efficient. No more leaks and much cooler in our warehouse. Thanks again.

Our roof had a problem area directly above some very expensive equipment. We had tried to waterproof it ourselves without success. CLM Commercial Roofing offered to solve our problem with a high quality coating system. CLM started the work on time, and made sure we were completely happy before they left. They exceeded our standards for safety and were friendly and courteous. Our problem area has been completely leak free since they completed the work. I am impressed with quality of their work and would highly recommend them to anyone!

Craig at CLM Roofing was a pleasure to work with on the repair of our 47,000 section of roof. I was very impressed by his product demonstration and his honesty about the few minor problems they encountered during installation. Our roof went from eyesore to a beautiful white finish. Even though it took a bit to finish the job due to unbelievable amounts of bad weather, he persisted until the very end! He visited the factory upon the next rain, without me asking, to ensure their work had done its job. With 90 team members and 100's of projects that we do every month I know a good company when I see one. Although CLM's product offering is not cheap, I found it to be the best value for the quality, warranty and overall product specs when comparing to the numerous quotes and products I researched.

We had an area on our tenant's building that we tried to waterproof on our own, without success. Since CLM Commercial Roofing completed the work, we have not had a single leak in the entire building. Our tenants are now very happy. The new skylights let in a lot more light, and our tenants were surprised at how much cooler the inside of the warehouse is since CLM installed the reflective coating. These guys definitely know their stuff.
