

**DEPARTMENT OF THE AIR FORCE
HEADQUARTERS 95TH AIR BASE WING (AFMC)
EDWARDS AIR FORCE BASE CALIFORNIA**

MAR 13 2007

Mr. James Specht
95 ABW/CEVC Environmental Management
5 East Popson Avenue, Building 2650A
Edwards AFB, California 93524-8060

To Whom It May Concern:

In January of 2007 Edward AFB contracted with UGE-ECS and American Integrated Services for the removal of approximately 200 tons of tertiary treated Class B sewage sludge solids from the Edwards AFB WWTP. There was a short suspense for accomplishment of this project, which resulted in a short period of performance, and the contractors were able to mobilize all necessary resources and seamlessly accomplish the project within the period of performance. The contractors' onsite management and offsite support personnel were also both very effective in accomplishing the logistics necessary for completion of the project. 95 ABW/CEVC was impressed with the quality service delivered by the contractor on this project.

Sincerely,

James Specht

James Specht, Program Manager
Hazardous Waste
