

“I just wanted to say thank you to all of you for being so fun to work with and being rock stars with the best attitudes EVER on this 16th-floor build for SPS. It means a great deal to me that you all come to the table every week with smiles on your faces and ready to solve whatever issue we’re up against. It’s an awesome thing and isn’t typical of every project. I look forward to working with you all and seeing you every week. I appreciate every single one of you and all of your efforts in making this such a great experience for everyone involved.”
