Re: Virginia State University –Recommendation of J R Caskey.

Dear Ginger,

J R Caskey has worked with Virginia State University on many site and utility projects such as the Gateway II Site Entrance Improvements and the Gateway II BMP Conversion. The buildings were fully occupied with Faculty, Staff, and Students entering and leaving the building. Your staff routinely coordinated their efforts with our staff and project managers throughout the duration of the project.

We have also worked together on small residential demolition and utility projects. The utility work was inspected by the local county and the projects were completed without any incidents.

We have been satisfied with the quality of work, and we look forward to continuing our relationship on future projects.

Sincerely,

Jonathan A Taylor, RA
Director of Capital Outlay, VCCO
