Reference Letter

2214010-GSP Terminal Improvement Project- Core

Delivered Via Email:

Dear Ms. Rosado,

The Skanska / Moss team task the Palmco team with the porcelain and ceramic tile scope of work on the Core phase of the GSP project. The project included tile within the renovation of existing spaces and new construction areas with blending the tile flooring from each of these spaces together from multiple flow points. The challenge of the Core being broken into numerous phases in order to keep the airport operation and connecting all the elevations from existing structures built by multiple contractors over decades of time to our new construction components being inserted between five previously built structures. The Palmco team was instrumental in the completion of the GSP Core project and the attention to detail and quality of the work was key to the success. With numerous field conditions affecting Palmco's work flow, Palmco never lost focus on the quality being delivered and paid attention to the details throughout the project.

Our team commends Palmco for the quality of their work and would not hesitate to recommend or use Palmco on future projects. Please call if you should have any questions or need any additional clarifications.

Sincerely,

Skanska / Moss II, a Joint Venture

Jason Heindel
Project Manager
