

Form-A-Tread® Test Project for World Trade Center Raptor Retractable Barrier Cover Plate Liberty Street at 9/11 Memorial - South Pool May 2017 - Present

Form-A-Tread was installed on the cover plate of one Heald Raptor Barrier system, located at street level, at the direction of Cushman & Wakefield. This plate is run over by hundreds of delivery trucks and service vehicles each day. It also endures direct sunlight, dirt, snow plows and ice melt chemicals.

After one year, the Form-A-Tread is completely intact, providing excellent visibility and traction for pedestrian traffic.
