Subject: Notice of Substantial Completion: Placing Additional Rock

Aaron: attached is a scanned copy of our Notice Of Substantial Completion. The hard copy is in the mail. Per the email below, placing the additional rock and addressing the issues on the punch list are all that is left to do.

At this time I want to acknowledge what an awesome job Tapani has done at this project. To accomplish the large amount of work on such a short time frame, with less than favorable weather issues, and stay on budget shows that Tapani is a cut above most contractors. Tapani's crew showed off their construction skills and abilities by handling the large scale tasks with speed and efficiency. I'll never forget the size of that 60 yard concrete pumper.

I would like to thank Aaron, Scotty, and Joe for all their efforts and commend them at how good they are at their work. Additionally, please give our thanks to all the Tapani crew for a job well done.

Ps – feel free to call Carole Rausch if you or your staff would like to volunteer to help spawn some fish. It would give your guys some perspective on why they built this pond (and it might be fun). The hatchery number is 360-837-3311

Thanks again.
