RE: Lewis and Clark State Park – Park Wide Water System – Contract SW-C1602

Dear Mr. Tapani :

I would like to take this time to let you know how appreciative I am with the results of this contract and to tell you, "Job well done!"

Your staff showed the highest standard of professionalism, starting with their good communication, quick responses to questions, concerns, issues, and finally, dealing with the complaints from State Parks staff.

Your staff was mindful in protecting our natural and cultural resources by taking a proactive approach to environmental issues, especially with their foresight regarding the ditching proposed for the ball field area. They saw a potential erosion and ground disturbance problem and proposed a great solution. They also cooperated with the archaeological investigation and showed their willingness and ability to be flexible.

Finally, your field crews demonstrated the knowledge and ability to perform the work per the contract specifications. In short, they were everything that State Parks needed in a contractor, and more.

Thank you for your hard work and attention to the needs of State Parks. We encourage you to bid on future projects, and wish your firm the best of luck.

Sincerely,

A handwritten signature in black ink that reads "Sanh Ho".

Sanh Ho,
Environmental Engineer
Southwest Region Parks Development
