We have been using One On Electric for several years and would highly recommend them.

We are a small, fast growing, business that purchased a property with two existing buildings and over the last couple years built two more buildings on the same site. One On Electric has been our electrical contractor for all of our remodel and new construction, as well as service calls for small jobs.

We continue to use One On Electric for several reasons.... communication, promptness, follow through, integrity, and we feel like we always pay a fair price.

Most importantly, and what I think sets them apart from contractors we have used in the past, is their attention to detail. From the consultative approach they take during the planning phase of our projects to the quality during the execution, every employee we have had onsite is committed to excellence and proud of their work product.
