**RE: Letter of reference for Georgia Green Energy Services LLC (GGES)**

As an entity that operates within the same market demography as JCC, that of being minority owned and operated, we had the pleasure recently of engaging the services of Georgia Green Energy Services LLC (GGES) as an electrical subcontractor on our United States Custom and Immigration Services (USCIS) Atlanta office security upgrade project.

The project ran a 6-month duration and saw GGES playing a pivotal role, working alongside our team on the project site that remained operational throughout the work execution. Our experience with GGES on the project was marked with efficiency, diligence, responsiveness and professionalism. They complimented our team well, enabling us to deliver successfully on a project that was of utmost importance and mission critical to the operation of the USCIS office.

Based on our experience with the GGES team, we are confident that like JCC, they will continue to grow and evolve into an industry leader within their market demography. We are excited about the prospects of us working with them again in the future. We also take great pleasure in endorsing GGES as a well capable and trusted partner to work with in your pursuit to bring your project to reality.

Please grant Gavin and his team at GGES your kindest consideration and courtesies.

Yours sincerely,

Orville P. Campbell  
Project Manager  
Jordon Construction Company (JCC)
