Dear Eddie and Amazing Crew,

This landscaping "journey" has been wonderful. I appreciate your knowledge, expertise, and your crew's continuous hard work, and care throughout this project.

Your company was chosen because you listened to what I was saying and then came back out to the site when I needed to see a "visual" outline of the project. It was at that time I knew this was the company to do the job.

I couldn't have imagined a nicer crew. They are consciences when it comes to the little details; sweeping and raking up each day before leaving; working as a fluid team; continually checking with me before work was done; asking my opinion; and being the kindest, best mannered bunch of men. You truly have a great group of men working for you.

The patio and planters look incredible, even better than I imagined. The irrigation problem was why I looked into Home Advisors, and I am thrilled I did. It works perfectly. No more busted black irrigation tubing! Your men took the time to explain the workings of the timer and terminals.

Again, it is with much gratitude that I thank you all,

Laurie Elling
