

January 1st, 2013

To whom it may be concern,

Dear Sir / Madam,

**Re: Recommendation to D.I.F Engineering and construction Ltd**

D.I.F Engineering Company began working for the Israeli National Transportation Infrastructure (former MAATZ) in May 2012, examining projects' final account and tenders before their distribution.

Under the agreement, initially for six months, currently extended to the end of 2013, D.I.F has audited dozens of projects as roads, intersections and bridges, totaling to more than 400 million ₪. [100 million\$]

Auditing final account includes review of final bill calculations against tender documents, contract plans, special methods of measuring, work content, content of prices and examining the site. Tender review includes a comprehensive examination of the plans, specifications and projects bill of quantity.

Until today, thanks to the audit reports issued by D.I.F and steps taken to resolve issues with project managers, D.I.F's work led to significant savings and also improved efficiency among supervisors and project managers.

In D.I.F's assertive and practical way, full consent cooperation from nominated project managers, supervisors and contractors were achieved.

I warmly recommend D.I.F to be very professional office with high ethical and quality service and availability to the client.

Sincerely,

Eng. Cotrus Adrian [ M.Sc., C.S.P.]

Head – Dept. of R&D and Standardization
