To whom it may concern

Re: DIF Israel Civil engineering LTD.

The company DIF Engineering LTD, is supplying for our company since the beginning of 2014, a services of pre-construction bids review and payments for contractors audit.

During this period DIF Engineering has been reviewed a large numbers of tenders and payments in complex infrastructures projects in a very high cost value.

I want to mention that the work which performed by the company is high profession and greatly improve the design quality and the readiness for commencement in the various projects.

The preconstruction tenders audits and the contractor's payments review performed with site visits and comprehensive review of the drawings, specifications, the scope of work and the bill of quantities of the projects.

In addition to their profession ability, The company DIF engineering is very careful about service and human relations with the project managers and the contractors, with whom they are working.

I am happy to recommend on DIF ISRAEL CIVIL ENGINEERING LTD as a professional and quality engineering audit firm.

Best regards

Yoel Even, CO Engineering
