

## QARC Silver Medal Award

ARMA's Quality Asphalt Roofing Case-Study (QARC) Awards Program seeks to recognize contractors across North America who choose asphalt roofing and who install beautiful, high-performing systems. These contractors choose asphalt roofing materials for their range of colors and designs, for their ability to meet stringent project requirements and for the peace of mind they bring to a homeowner or building owner.

Reliant Roofing was recognized by the Top Asphalt Roofing Manufacturers Association's in their annual Quality Asphalt Roofing Case-Study (QARC) Awards Program for our completion of Topsail Residence, a 10,600-square-foot asphalt shingle roofing system designed to endure high-wind events in Ponte Vedra, FL. The QARC awards are given for the projects that exemplify the most beautiful, affordable, and reliable asphalt roofing systems in North America.
