

PODS® SOLUTIONS FOR

Construction

Residential and industrial construction needs can vary widely. That's why PODS offers tailored moving and storage solutions. Our highly trained Business Solutions Specialists understand construction logistics and work with you to determine everything your crew needs, from ground breaking to ribbon cutting.

Manage inventory more effectively.

If you buy materials in bulk or build up work packages ahead of time, PODS offers flexible off-site storage solutions. We deliver a sturdy, weather-resistant container you can load at your convenience. Then we drive it to a secure, local PODS Storage Center, where it's kept until you need it again.

Start on schedule. Stay on schedule.

Start your project with everything you need on site by transporting and storing materials and equipment in PODS containers. The flexibility we offer keeps your projects organized and on schedule.

Keep construction materials close at hand.

Whether you're concerned about theft, vandalism, or weather damage, PODS containers help reduce risk. Containers loaded with construction assets can be stored on-site, or in one of our 230 secure PODS Storage Centers to be delivered when and where you need them.

Avoid costly slowdowns with convenient jobsite storage.

Efficient equipment management keeps tools and materials organized in one place so crews and subcontractors can find what they need quickly.
