TYPES OF CONTRACTOR REGISTRATION CERTIFICATES

Below are the definitions of the four types of contractor registration certificates. The definitions show the extent to which certificate holders can work in the construction trade and whether the certificate covers employees. General contractors can check the certificate type to ensure the subcontractors they hire are working in the capacity in which they are registered. Customers can check contractor certificates for the same reason.

NO EMPLOYEES, MAY HIRE EXEMPT WORKERS ONLY

This means the contractor does not carry workers' compensation coverage on any employees.

EMPLOYER

This means the contractor carries workers' compensation coverage on employees.
The certificate holder is registered to have employees.

LEASED EMPLOYEES

This means the contractor uses employees from an employee-leasing firm.
These employees are presumably covered with workers' compensation and unemployment insurance through the leasing company.

BID ONLY

This means the contractor is registered only to bid construction work in Montana and cannot perform actual work. To work the contractor must upgrade the certificate to one of the above.
