Re: General Contractor Recommendation Letter for Place Services Inc.

To who it may concern,

As the CEO of Plateau Excavation and one of Amazon's repeat Site Contractors, I am honored to say I have personally worked with and performed over **45** large retail and commercial distribution projects with the Leadership of PSI.

These projects ranged from **100,000** to **500,000** square feet in building footprint space, with **30** to **70** acres disturbed and developed, and all combined value exceeding **\$200,000,000** in site grading and underground utilities from initial ground breaking through final curbing and paving, landscaping and grassing.

PSI's leadership receives 5 Stars for my overall experience from initial contracts through final completion, closeout, and payment.

I can personally attest they are truly a group of talented and highly experienced construction professionals, with the competency, resources, and construction support team to deliver Excellence in Construction for Amazon in the construction of their large-scale warehouse and distribution facilities.

Feel free to contact me directly if you have any further questions.

Professionally,

*Greg Rogers*
