MOLD REMEDIATION SERVICES

In addition to possible health hazards, mold infestation can create serious structural problems if not remediated or if remediation is done improperly. Paul Davis offices are required to be certified by IICRC in mold removal (applied microbial remediation) or the American Council for Accredited Certification (ACAC).

Requiring such accreditation demonstrates our commitment to provide the best-trained and qualified technicians, to ensure that the work is handled properly from step one through completion. We'll keep your policyholders informed throughout the job and answer any questions they may have about the process.

MOLD REMOVAL

Paul Davis provides a wide array of mold removal services including:

- **A remediation plan and documentation to meet your specifications**
- **Establish "negative air" to contain the mold spores and prevent further dispersal**
- **Removal and disposal of all contaminated building materials and contents**
- **Clean all surfaces, materials and contents that can be restored**
- **Identify and eliminate the source of the moisture that allowed the mold to establish**
- **Extract excess water and dry affected area / material if needed**
- **Coordinate with the Indoor Environmental Professional (IEP) to collect post remediation samples and verify that the remediation is complete**

BENEFITS TO POLICYHOLDERS:

- **Reduce health risks and chance of the mold recurring**
- **Improved indoor air quality**
- **Assurance that the job is done correctly**
