# Global Motorcycle Manufacturer

When this global motorcycle manufacturer moved to Pennsylvania, they relied on Vested Energy to deliver superior lighting that would keep their new crew productive and cost-efficient under their operations budget.

As a manufacturer's rep, we delivered better results with wholesale pricing and handled all the details of the lighting logistics.

Our licensed technicians swiftly retrofitted, replaced and recommended LED lighting solutions to their specs. ROI was calculated upfront, so they knew what they were going to save.

## Project

## LED Lighting Conversion – Area 1

Lights Installed

325W LED High Bay  
and 165W LED High Bay

**As a manufacturer-direct representative, we pass on the savings on to you.**

Our LED lighting technologies deliver exceptional lighting with a 10-year manufacturer's warranty. LED lights can last 5x longer than conventional conventional fluorescent fixtures with up to a 75% reduction in energy costs. In addition, the light output is more effective for worker productivity and safety.

Located just outside of Philadelphia, we are easily able to handle multi-location properties... With easy access to airports, an installation team with 22 locations throughout the United States, and International manufacturers with many domestic and global distribution centers.

We work with utility companies throughout the US and help calculate your savings, rebates and ROI, as a complimentary service. Again, making your operating overhead a lot lighter and much brighter!
