RE: Heritage Fellowship Church – Built 2010/2011

BBB Masonry was awarded the contract on the Heritage Fellowship Church project in Herndon Virginia back in 2009. The masonry phase began in the summer of 2009. Construction continued through the winter and into the Summer of 2010. This beautiful masonry project was completed in 2011 on schedule. Throughout the project BBB Masonry's technicians were always professional and accommodating.

The job was extremely complex in some areas especially the precast section of the building. BBB Masonry appeared to know all of their technicians skills well enough to know which technician to put in each of the specialty areas. We feel that everyone was very pleased with the final product. This is the first project that we have teamed up with BBB Masonry on and we would be confident in working with them again as well as recommending them for similar projects.

Sincerely,

Whitener & Jackson, Inc.

Mark Laughlin  
Project Manager
