

To Whom It May Concern:

Our vision at New Genesis Health is to provide inspiration and excellence in alternative healing to improve the quality of life for all who are within our reach. We are specialists in herbal and alternative healthcare solutions. In addition to offering locally blended natural health care products with The Green Herb brand proprietary herbal formulas, we also provide healthcare services such as acupuncture, chiropractic care, live blood analysis, hyperbaric chamber and salt cave.

We engaged Sanjay Tyagi of Schooley Mitchell to analyze our Credit Card, Waste and Shipping expenses, and assess if we were over-paying for any of these services. Sanjay's proposition carried no-risk for us at all. His fees would be just a share of the savings he found for us, and no fees if there were no savings. Also, his team is independent and not beholden to any vendor. So his cost-saving recommendations would always be in our best interest.

I am pleased with results from Sanjay's team. They found savings of 26% in our Waste expense and 16% in Credit card fees. They also determined that our shipping expenses were already optimized. There was no pressure from Sanjay, and I was able to make informed decisions based on his comprehensive Value Reports detailing saving options. I strongly recommend Sanjay to any business that is interested in reducing operating expenses at no-risk or investment.

Sincerely,
