Dear Mark,

The congregation at Calvary Baptist and the congregation's project renovation team (including myself) wish to express our utmost appreciation to all your construction group (yourself, others, and especially construction foreman, Theo Mayak), along with lighting associates, Jim Rothenberger and Co., in developing and implementing a beautiful, multi-use sanctuary stage with multi-use lighting that has already served us in new and previously impossible ways. Your knowledgeable and informed advice turned the project into one of great appreciation by our congregation as the project proceeded seamlessly each week.

Our congratulations are even more meaningful since we, as a church, did not present to you any professional architectural structural plans for your company to work with, but rather relied on your many years of collective construction experience to extrapolate simple line drawings into a final completed beautiful structure of enlarged carpeted stage and additional floor carpeting, inlaid hardwood flooring, matching removable side oak hand rails, matching removable oak side panels, removable carpeted stage risers, beautiful movable curved oak privacy panels for our choir, and superb multi-use track lighting with multiple controls, allowing us to present our worship services (especially evening services) with a more creative spirit, enhanced sanctuary beauty, and personal experiences.

Once again, you have proved yourself and your company a pleasure to work with, due to your honesty, integrity, and fine source of helpful and experienced innovative vision for even a small church such as ours.

Sincerely Yours,

James R. Bell
Treasurer and Project Manager
Calvary Baptist Church of Allentown
