To Whom It May Concern:

Elstner Construction Company Incorporated has successfully completed a number of projects for the 99th Regional Support Command (see enclosed attachment for details). Every one of the projects was completed on time without a punch list during post-inspections. All the jobs were done for less than or equal to the independent government cost estimates.

The quality of work was consistently excellent. The attention to detail that Elstner Construction Company provided always met our high expectations. Elstners' outstanding performance will make her a priority contractor for future projects within her realm of expertise. If there are any questions, feel free to call me at 412.298.6213

Sincerely,

Toby E. Croyle
Facility Management Officer, GS-13
