When You Need Division 06 Building Products ... Call Certified Wood Products, Inc.™

Certified Wood Products, Inc.™ (CWPI™) supplies a full line of rough and finish carpentry – Division 06 building products.

- We carry a large inventory of fire-retardant and preservative-treated forest products that are agency certified and Kiln Dried after Treatment (KDAT). They carry a stamp you can trust.
- Our rough carpentry packages include precut in-wall bracing and blocking, panelized walls, roof blocking and bracing and ripped plywood and lumber.
- We supply DensGlass® Gold Exterior Sheathing that is resistant to decay, delamination and deterioration due to weather exposure. It also resists warping, rippling, bucking and sagging for a flat and even substrate.
- Our finish carpentry packages include T&G patterns and custom profiles and millwork: window casing, baseboard, chair-rail, extension jams, trim, moldings, etc.

CWPI™ is a premier supplier of forest products that are third-party certified which will contribute towards earning credits under the LEED® Green Building System and The Living Building Challenge™.

We stock FSC®- certified forest products for immediate order and shipping, making it very easy to buy cost effective and environmentally responsible materials when projects require them.

CWPI™ consults with and supplies commercial contractors and builders with complete custom timber roof systems, from design assistance through installation. We supply ACFoam® nailable roof insulation for new and re-roofing applications.

We supply laminated timber, solid timber, beams, arches, trusses, columns, bridges, solid roof decking and laminated roof decking. We provide pre-finishing and preservative treated options.

We supply Lock-Deck® Laminated Decking, a structurally engineered product used for ceilings and roofs as well as for balconies, mezzanines and floors. Extraordinary designs can be created for commercial structures such as offices, hotels, churches, pool areas and more! Factory finishing provides a high-quality finish.

We supply Atlas ACFoam® Nail Base Insulation, Atlas ACFoam® Cross Ventilated Roof Insulation and Atlas ACFoam®-II Roof Insulation. We provide Atlas Nailable Insulation Fasteners for proper attachment of these products.

WHAT DOES YOUR NAME, CERTIFIED WOOD PRODUCTS, INC™, MEAN?

- We supply forest products that are **certified** by the Forest Stewardship Council (FSC®- certified).
- We carry fire-retardant and preservative-treated forest products that are agency **certified**.
- All lumber and plywood is agency **certified** and grade-stamped for easy identification in the field.

WHAT IS DIVISION 06?

MasterFormat is a list of DIVISIONS (titles and numbers) used to organize specifications for commercial and institutional building in the U.S. and Canada. DIVISION 06 comprises lumber, sheathing, timbers, millwork, roof decking, etc.

HOW LONG HAVE YOU BEEN IN BUSINESS?

We've been supplying forest products to the building industry for over 30 years, adding FSC®- certified lumber in 2001. We work hard to be your long-term business partner so we can bring our accumulated knowledge to your projects.

WHERE DO YOU DO BUSINESS?

We ship throughout North America. We also ship internationally. And, we can deliver to your job site.

WHAT ARE YOUR DIFFERENTIATORS IN THE MARKETPLACE?

1. We stock a wide variety of FSC®- certified wood, ensuring forest management is environmentally beneficial and sustainable.
 - It is stored in a warehouse that is environmentally controlled – protected from rain, snow and direct sunlight. It is available for immediate delivery. Our customers tell us, “This is some of the best lumber we’ve seen.”
2. We offer custom cutting and milling for rough carpentry packages.
3. Our staff has over 100+ combined years of experience in the forest products industry. Most of us grew up in the trades. Our technical and educational backgrounds in wood fiber and engineering enable our strong consulting expertise.
 - We advise superintendents, in the field, on the proper installation of specialty heavy timbers.
4. Current customers refer us to others because of our solution-centric service and excellent wood quality. We hear, “It comes down to price and service, and you’ve by far outshined the guys I’ve previously dealt with, on both accounts.”
5. We provide custom factory finishes on millwork and custom timber roof systems.
6. We’re very successful in sourcing hard-to-find forest products and specialty items, both FSC®-certified and non-FSC®-certified.
7. We are a woman-owned business entity.

WHAT SPECIES OF MATERIALS DO YOU SUPPLY?

Our resources span across North America. We supply a wide variety of domestic softwoods and hardwoods.

DO YOU HAVE MINIMUM OR MAXIMUM ORDER SIZES?

We supply a few pieces up to multiple full rail cars. We can break apart units.

CAN YOU SUPPLY CURVED LAMINATED TIMBERS?

Yes! Call our Technical Sales Representative, Larry McCoy. He works with designers and commercial contractors on complete custom roof systems, from design assistance through proper installation.

DO YOU FURNISH AND INSTALL TIMBER ROOF SYSTEMS?

We provide the lumber products. We have a network of qualified installers for erecting the timber roof systems.

HOW CAN WE START DOING BUSINESS WITH CWP?

Call us! Email us! If you are in the Minneapolis/ St. Paul and surrounding areas, we can meet you in person. We'd love to have you visit our warehouse to experience what makes us your quality supplier of DIVISION 06 products.

DO YOU UNDERSTAND OUR BUSINESS?

Because of our vast years of experience and focus on DIVISION 06 forest products, most likely we have helped businesses that are similar to yours. However, since each company is unique, we work with you to make sure we learn the right information to meet your project needs with the right products and solutions when you need them. We're part of your success. Our customers tell us we're easy to do business with!

DO YOU HAVE A LIST OF YOUR FSC®-CERTIFIED INVENTORY?

Yes. Find it on our website at www.certifiedwood.net or call us and we'll send you a copy. And please remember ... forest products are renewable, non-toxic, biodegradable and sequester carbon - how perfect is that!
