CASE STUDY

DLL Financial, Philadelphia PA

A Cost-Effective Solution for Keeping Facility Restrooms Updated

The Problem

Tile floors, walls, showers and laminate vanities in restrooms at DLL Financial were worn and difficult to clean creating a potential maintenance problem. In addition, the checkerboard tile walls and floors created a dated image. DLL's building Facility Manager sought a long-term solution to enhance routine maintenance, sanitation and the appearance of the facility restrooms.

The Miracle Method Solution

As a trial, Miracle Method offered to demonstrate its refinishing process in two of the locker room restrooms. The solution to refinish the existing surfaces in Natural Accents[®] stone look-finishes gave the restrooms a modern upgrade and an easier to clean surface. The refinishing process also would help the facility avoid extensive removal and replacement costs.

The Process

Miracle Method technicians used proprietary cleaners to thoroughly remove dirt and oils from the tile floors, grout, walls, showers and laminate vanities. Grout lines were then permanently sealed to inhibit the growth of mold and mildew. All of the surfaces were refinished in Natural Accents[®] stone-look finishes for long-lasting beauty and durability. To complete the

renovations, Clinical Plus[™], a silver ion based antimicrobial clear coat was applied to protect the new finish against bacteria that can cause degradation, discoloration and foul odors.

OPTIONAL
Silver Ion Antimicrobial
CLEAR COAT

The Results

The restrooms were transformed to like new condition in just three days with minimal downtime and disruption to employees and visitors. The refinishing process significantly improved the appearance and clean-ability of the restrooms. By exceeding the facility's expectations, Miracle Method was selected to refinish all of the public restrooms at DLL Financial in Natural Accents[®] with the use of the silver ion antimicrobial clear coat.
