CASE STUDY

## Hilton Milwaukee City Center

### Squishy Bathtub Liners Removed and Bathtubs Refinished *Moldy Odor Eliminated and Tubs Look Like New*

▲ Miracle Method was able to remove the failed liners, drain the trapped water, remove the mess, and restore 500 tubs to like new.

#### The Problem

A decision to replace worn out and discolored bathtubs with liners became disastrous when the liners leaked. This resulted in an unacceptable “squishy” feel for guests, and the trapped stagnant water caused mold and unpleasant odors. The hotel had two choices: remove the liners and the bathtubs at considerable expense and disruption to guests or ask Miracle Method to remove the liners and restore the bathtubs.

#### The Miracle Method Solution

After comparing cost, time and construction mess, the decision was made to have Miracle Method remove 500 liners and refinish the original bathtubs.

#### The Process

Miracle Method was able to offer turnkey service by cutting out the old liners, draining the trapped water and removing the black adhesive. After the tubs were thoroughly cleaned and disinfected, they were beautifully restored using Miracle Method's proprietary refinishing process. To complete the job, drains and overflows were replaced and the tubs were re-caulked.

#### The Results

The Hilton's squishy liner problem was eliminated and the bathtubs were restored to their original clean and glossy appearance. Miracle Method was able to save the hotel time and money while minimizing disruption to the hotel's guests.
