CASE STUDY

Isle of Capri Casino, Natchez, MS

Bathrooms Were in Need of a Makeover

The Property

The six story, 148 room Isle of Capri Casino and Hotel located in Natchez, MS.

The Problem

After years of use, the original fiberglass tub/shower units were dull, faded and many had cracks. The laminate vanities were old and outdated, and some were burned and scratched. The tile floors and walls had dated colors and expensive replacement was being considered.

The Miracle Method Solution

Miracle Method was selected on the basis of reputation and experience working in hotels without disrupting guests. Isle of Capri wanted the fiberglass units restored to glossy white and chose Miracle Method's Natural Accents[®] for their vanities, floors and walls to give the rooms a contemporary appearance they were looking for.

The Process

Isle of Capri management scheduled rooms in blocks allowing Miracle Method's team of technicians to work efficiently and stay on schedule. The fiberglass units were repaired and refinished in white, while the vanities, floors and walls were updated in warm beige colors using Miracle Method's Natural Accents.

The Result

Miracle Method was on time and on budget. More importantly, the dramatic transformation wowed management and their guests. Miracle Method was awarded additional work on the hotel's riverboat casino and is being considered for work at other Isle of Capri Resorts.
